Founder,
Pentaspac

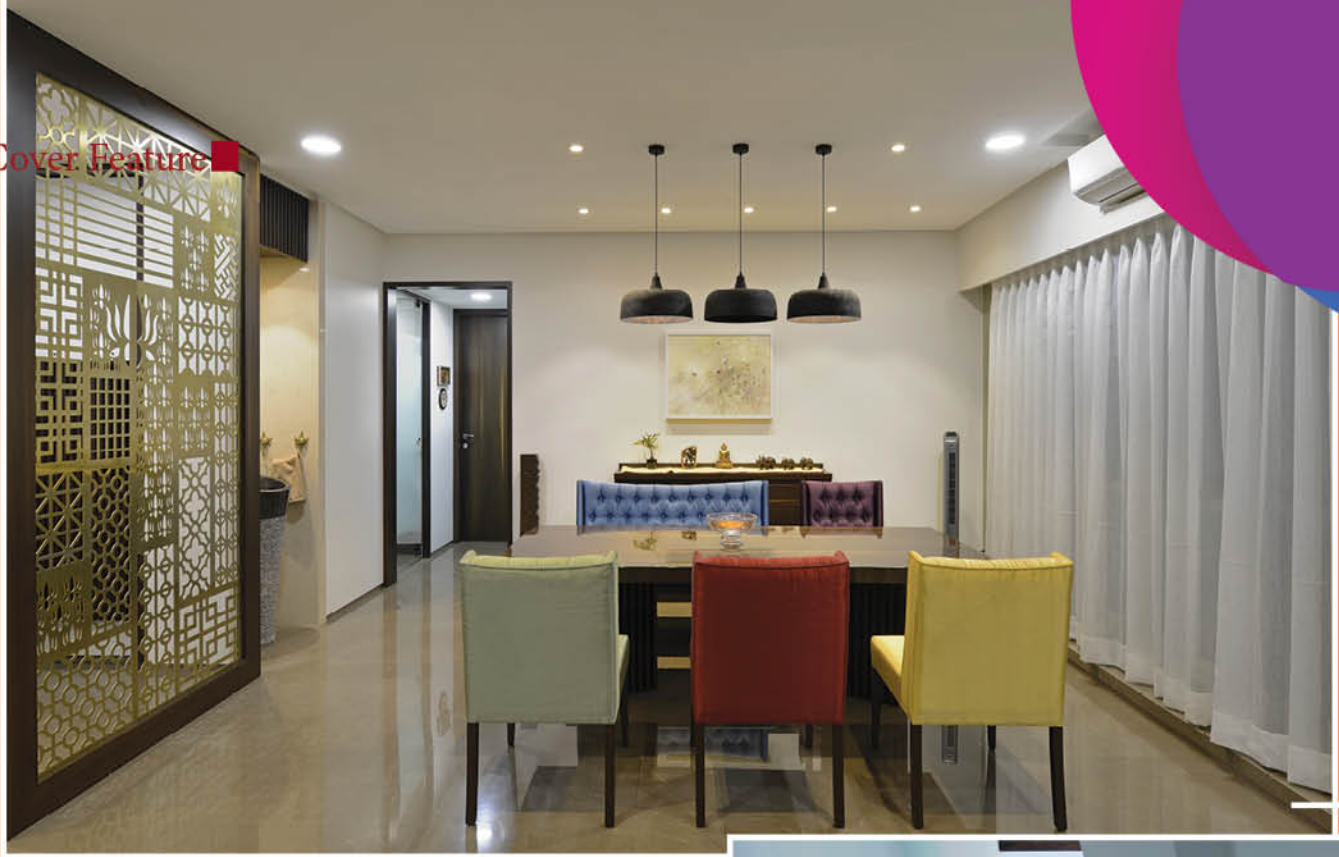

What is your journey as a successful designer so far and the way you have added growth in your portfolio?

Being awarded as “The Fastest Growing Architectural Practice: by Indian Economic Development & Research Association (IEDRA), we have designed and executed real-estate of 8.5 Million Sq. Ft. since our inception and have currently 4.0 Million Sq. Ft. under construction.

Share with us the way you created space in your niche, as a popular next generation designer and have excelled in the conceptual architecture.

“Quality of our surroundings can change the quality of our lives.” And through Architecture we believe we can change the quality of lives of the end user. We have created a niche for conceptual and contextual architecture in our projects.

Pentaspac Consultants: Pentaspac Consultants is an award-winning design consultancy comprising of a team of architects that are young yet well-equipped with remarkably distinctive concepts. Our portfolio involves clients belonging to a broad spectrum of industries like Retail, Hospitality, Mass Housing, Industrial, Commercial & Residential Housing, Skyscrapers, Affordable Housing, et al.

We have won various national and international accolades in the field of design. The latest one being awarded by Indian Government body: "Indian Economic Development Research Association" as "The Fastest Growing Architectural Practice In India." and India's Best Design Project Award 2017 by India Pool.

Opine on the role of the government, to develop the field of designing and architecture, as a major part of the development endeavors of the nation.

Government interventions & Protection for the creative fields is a must for the artists to work with full freedom of expression and to express their ideas to the fullest.

If given an open space to discuss your in-depth views on the subjects you desire to share with your audience at large, what they would be and why?

We are in a great position in this country to experiment & to explore different ideas and come out with urban solutions in a pragmatic way. We should take full advantage of this position and think outside the box and explore the unconditioned.■
