“
Try Try Till You Succeed...!

”

Describe your style of designing. Who has influenced your design styles?

It's mostly Contemporary, Minimalistic & Functional. We don't patronize any particular style. We like to design on the briefs merit. Now with a Global Community & Technology international Architects Ar. Norman Foster, Ar. Big as well as local flavor of Ar. B.V Doshi is what is the need of the hour.

What kind of design software and equipment do you use in your work?

As architects nothing really can replace a Pencil & a tracing paper. In the studio we work with Models, Auto-Cad, Revit and other 3D modeling softwares.

Your critically acclaimed project...

Project Aroha... its inspired by the Buddhist caves in the Sanjay Gandhi National Park. It's nestled in a busy Suburb of Mumbai with a Micro Environment of its own.

A valuable lesson learnt from your practice?

Keep Designing, Bad Time, Good Time all is temporary, got to just keep Designing....!!!

Designing is a journey which has no start and no end we have to enjoy the whole process over and over again project to project.
