### Project information

Zen World

By Pentaspace Design Studio

Location: Kanjurmarg, Mumbai

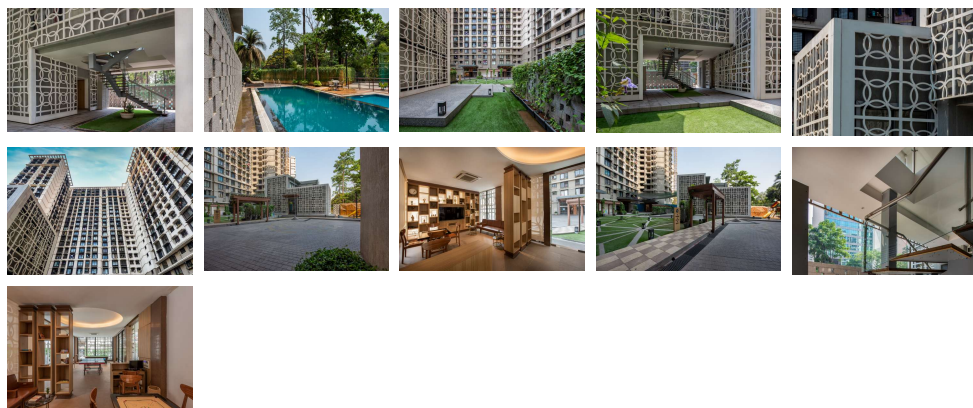

being cool and connected, the aura in this residential complex conveys this relaxed vibe through its architecture, thoughtful design & amenities.

Zen World by Kanakia elevates the concept of affordable housing. It is located in the upcoming suburb of Kanjurmarg, away from commercial centres of Mumbai. Five completed and fully occupied towers (with the last and tallest currently in construction) are lined up with all 2 or 3-BHK apartments overlooking the sprawling salt pans and designated no-development zone nearby. Each apartment has ample light and ventilation, as well as an inner view of the private clubhouse that is the centrepiece of this development.

Every one of the buildings enjoys the serene ecosystem within the complex, giving residents the feeling of residing in an oasis. The clubhouse is lined and clutter free, and anchored by the micro-environment created by the clubhouse at its very heart. This central rectangular space has a Japanese-style roof and a double-glazed jaali of laser-cut Shoji panels that are layered over a glass box.

The clubhouse has multiple amenities such as a spa, gym and games area, and is connected to the outdoor pool, children's play area, gazebo, skating rink and basketball court. Lush gardens by a Japanese landscape designer cocoon this zone and extend towards the street. In the rush of urban life, Zen World is where time slows down, and where its residents have the luxury to enjoy their own sanctuary.
